**Relationship between the Course and Mechanical Engineering Curriculum**

	Program Outcomes	Level of Contribution		
		1	2	3
a	An ability to apply knowledge of mathematics, science, and engineering on mechanical engineering problems			
b	An ability to design and conduct experiments, as well as to analyze and interpret data and use modern tools and equipment.			
c	An ability to select, develop and/or design a system, component, or process to meet desired performance, manufacturing capabilities and economic requirements.			
d	An ability to function on and/or develop leadership in multi-disciplinary teams.			
e	An ability to identify, formulate, and solve mechanical engineering problems.			
f	An understanding of professional and ethical responsibility			
g	An ability for effective written and oral communication in Turkish and English.			X
h	An ability to understand and comment on the impact of engineering solutions in a national and global context.			
i	A recognition of the need for, and an ability to engage in life-long learning			
j	A knowledge of contemporary issues in mechanical engineering			
k	An ability to use the techniques, skills, and modern engineering tools , such as computer programs, necessary for engineering design and analysis and use modern information systems			
l	A detailed knowledge of and experience on a specific application field of mechanical engineering			

**1: None, 2. Partial, 3. Full**
